BIT report NEW YORK NEW YORK feb 07-02 Waldorf Astoria Hotel
WEF Forum: FOR IMMEDIATE RELEASE
BIT ROCKET

: designed for the WEF to launch from the center of street demonstration

Documenting actual crowd attendance BIT ROCKET is able to supply accurate figures of WEF participation external to the conference venue. Media-estimates of attendance nos. at protests typically vary by a factor of about 10: BIT ROCKET can provide a decisive resolution. Co-ordinated with march, the video stream from rocket launch can supply demonstrators with strategic data eg. location and containment strategies of enforcement agencies, along with a family aero-portrait. Live rocket footage is streamable to web sites and could offer the curious WEF delegate a dynamic glimpse of conditions outside the summit venue.
